

Below is a list of custom exempt plants licensed as of December 2020. The term "custom exempt" refers to those licensed operations that slaughter and/or process livestock that no part of the animal will ever enter commerce. All products, including carcasses, must be returned to the owners marked "Not For Sale". The owner may not sell any custom exempt processed meat products. And poultry may only be sold under a licensed exemption. Products sold in commerce must bear the mark of inspection for a state or federally inspected establishment.
